Continuing the Publication

Founded by Herman Knapp, 1869

The objectives and goals of the *Archives of Ophthalmology* are education: To inform its readers of progress, problems, and pertinent research in the practice of ophthalmology through the publication of original contributions and observations.

# When someone in your family gets cancer, everyone in your family needs help.

Nobody knows better than we do how much help and understanding is needed for the family of a cancer patient. The patient's spouse is under tremendous stress, and the children are often forgotten or just plain left out. That's why our service and rehabilitation programs emphasize the whole family, not just the cancer patient.

We run local programs nationwide with millions of volunteers whose lives have been touched by family members or friends with cancer or who themselves are recovered cancer patients. That's what makes the American Cancer Society one of the largest, best motivated and most caring of any health organization in the country.

Among our regular services we provide information and guidance to patients and families, transport patients to and from treatment, supply home care items and assist patients in their return to everyday life.

Life is what concerns us. The life of cancer patients. The lives of their families. So you can see we are even more than the research organization we are so well known to be.

No one faces  
cancer alone.
