# OPHTHALMOLOGY

APRIL 2004 VOLUME 122, NUMBER 4 PAGES 437-676

## EDITORIAL

- Blindness and Visual Impairment:  
A Public Health Issue for the Future  
as Well as Today** 451  
*Frederick L. Ferris III, MD;  
James M. Tielsch, PhD*

## CLINICAL SCIENCES

- Photodynamic Therapy for Occult Choroidal  
Neovascularization With Pigment Epithelium  
Detachment in Age-Related Macular Degeneration** 453  
*Ruth Axer-Siegel, MD;  
Rita Ehrlich, MD;  
Irit Rosenblatt, MD;  
Michal Kramer, MD;  
Ethan Priel; Yuval Yassur, MD;  
Dov Weinberger, MD*

- The Artificial Silicon Retina Microchip  
for the Treatment of Vision Loss  
From Retinitis Pigmentosa** 460  
*Alan Y. Chow, MD;  
Vincent Y. Chow, BS;  
Kirk H. Packo, MD;  
John S. Pollack, MD;  
Gholam A. Peyman, MD;  
Ronald Schuchard, PhD*

## LABORATORY SCIENCES

- The Effects of Scleral Buckling  
on Young Rabbit Eyes** 473  
*Andrew A. Moshfeghi, MD; Scott D. Pendergast, MD;  
Michael K. Hartzler, PhD; Philip J. Ferrone, MD*

## EPIDEMIOLOGY

- Causes and Prevalence of Visual Impairment  
Among Adults in the United States** 477  
*The Eye Diseases Prevalence Research Group*

- Prevalence of Cataract and  
Pseudophakia/Aphakia Among Adults  
in the United States** 487  
*The Eye Diseases Prevalence Research Group*

- The Prevalence of Refractive Errors Among  
Adults in the United States, Western Europe,  
and Australia** 495  
*The Eye Diseases Prevalence Research Group*

- Trends in Visual Acuity Impairment  
in US Adults: The 1986-1995 National  
Health Interview Survey** 506  
*David J. Lee, PhD;  
Orlando Gómez-Martin, MSc, PhD;  
Byron L. Lam, MD;  
D. Diane Zheng, MS;  
Dulce M. Jané, MS*

- Risk Factors for Recurrence of Postoperative  
Trichiasis: Implications for Trachoma  
Blindness Prevention** 511  
*Hui Zhang, MS; Ram P. Kandel, MPH;  
Basant Sharma, MD;  
Deborah Dean, MD, MPH*

- Risk Factors for Xerophthalmia  
Among Mothers and Their Children  
and for Mother-Child Pairs With  
Xerophthalmia in Cambodia** 517  
*Richard D. Semba, MD, MPH;  
Saskia de Pee, PhD;  
Dora Panagides, MHS;  
Ouk Poly, MD;  
Martin W. Bloem, MD, PhD*

- Risk Factors for Incident Cortical and  
Posterior Subcapsular Lens Opacities  
in the Barbados Eye Studies** 525  
*Anselm Hennis, MBBS, PhD;  
Suh-Yuh Wu, MA;  
Barbara Nemesure, PhD;  
M. Cristina Leske, MD, MPH;  
for the Barbados Eye Studies Group*

- Prevalence of Open-Angle Glaucoma Among  
Adults in the United States** 532  
*The Eye Diseases Prevalence Research Group*

- An Epidemiological and Clinical Study of  
Ocular Manifestations of Congenital Rubella  
Syndrome in Omani Children** 541  
*Rajiv Khandekar, MS (Ophth), PGDip Epi;  
Salah Al Awaidy, PGDip Epi;  
Anuradha Ganesh, MRCOphth;  
Shyam Bawikar, MD, MPH*

- The Prevalence of Diabetic Retinopathy  
Among Adult Type 1 Diabetic Persons  
in the United States** 546  
*Monique S. Roy, MD;  
Ronald Klein, MD, MPH;  
Benita J. O'Colmain, MPH;  
Barbara E. K. Klein, MD, MPH;  
Scot E. Moss, MA;  
John H. Kempen, MD, PhD*

**About the Cover**

**I**n the early 1820s, Louis Braille developed and published a system of dots to represent letters, numbers, mathematical symbols, and musical notes. Braille himself was blind from trauma and subsequent sympathetic ophthalmia at age 3. When he was a child at the school for the blind in Paris, France, Braille learned a phonetic system of raised dots and dashes that had been developed by a French army captain for soldiers to compose and read messages at night. As a teenager, Braille refined this technique of tactile writing into a succinct 6-dot system of the alphabet. Each letter of the alphabet is represented as a combination of dots and spaces in a rectangle of 6 cells containing 2 columns and 3 rows. Our cover provides representational examples, modified for print, of Braille's method and also serves as a visual portal for this issue's special theme: blindness.
